

# HOUSING PROJECT COMING

A high-density housing development will be built on a small grassy field on Broadway at Clay, across from Train Town. The developer has been chosen and the site plans have been drawn up—they show 49 rental units for homeless, low-income, and extremely low-income tenants. They need to build three-story buildings to accommodate 49 units, which are far more than the City's Development Code allows along the Broadway Corridor

We all must work to modify this housing development to preserve the character of South Sonoma and prevent exceptions to

**Density. Height. Zoning. Parking. Setbacks.**
